Wizard of the Wave" were the pieces performed last rening-both of them splendid spectacle pieces, rewith elegant scenery, beautiful decorations, fine tableaux, dances, songs, &c., all performed in first-rate style by the talented Bowery company. Miss Taylor in the first piece was the prominent character as the warlike and beautiful queen of the nymphs and guardian sprites of the Rhine. "The Naiad Queen" has proved immenely attractive; and it is really amusing te witness the delight and enthusiasm displayed by the audience as each successive scene passed off. J. H. Hall as Rupert the Fearnought, "with his shining casque and burnished blade," makes an excellent knight, sams peur et sams reprochs. The dances, tableaux, &c., enlivened by the comicalities of Burke as the squire of Rupert, were really beautiful, particularly the tableau at the end of the second act, where Rupert pledges his heart and sword to the fair queen. "The Wizard of the Wave," with all its remarkable singe effects, of such a novel and pleasing character, ux, dances, songs, &c., all performed in first-rate

Ninlo's THEATRE -This magnificent theatre was of the beauty and fashion of the city. The entertainments commenced with the interesting coes that reiterated cheers followed its execution, concluding piece was the pantomime of Vol au, in which the agile Mercetti, kept the audience in sof laughter by his exceeding comic action. Niblo are to go ahead, as he is indefatigable in his exerts te cater well for his patrons. He has engaged at celebrated artists who will appear on Monday

p'dly coming to a close, and the manager can with truth, boast that his theatre is fully patronized to the last, as every night the house is crowded to its utmost last, as every night the house is crowded to its utmost capacity, and the applause is as vociferous as ever. The eccentricities of Chanfrau, as Mose; the vivacity of Miss Mestayer, and Lize, the jocularity of Winans, and the general excellence of all the members of the company, are such as to keep the ball rolling pretty lively at the Chatham. Last night, after the amusing piece of 'Land Sharks 'and Sea Gulla,' and the very pretty comedy of "Nature and Philosophy.' the great "Glance at New York" was performed with much applause, and the pretty musical piece of "Faul and Virginia" concluded the entertainments. To-night a capital bill will be presented, for which we refer to the advertisement. By the bye, at the close of the season, the members of the company, and, in fact, all attached to the house, intend giving their worthy young manager. Mr. thantrau, a complitheir worthy young manager. Mr. Chantrau, a conpli-mentary benefit. This speaks well for the harmony and good feeling among the members of this capital company, and we doubt not that they will have a fine house on the occasion, when a first rate bill will be BURTON'S THEATRE. CHAMBERS STREET -Tois dar-

ling little theatre, under the skilfal guidance of Burton and Brougham, aided by its happy location and convenient proximities, being within pistel-shot of the Astor House and the Park, nightly attracts overflowing houses. Last evening Mr. Crisp, as Tristram Fickle, and Miss Chapman as Fariella, added, if possible to the enthusiasm of the audience in their favor. They are decidedly great favorites of the public, and well deserve to be so. The "Irish Dragoon" was again performed, in which Mr. and Mrs. Brougham sustained the principal parts with unexampled talent and rare success. Of the rich, dazzling, and fascinating representations of the Viennoise troupe of danseuses, it is not necessary here that we should repeat our eulogiums. The Eastern molarch who was dying of ennui, and offered a reward to any one who would discover a mew pleasure, might have found it, we think, if he had come here, as far as the ocular faculty can find it. A nd Brougham, aided by its happy location and

husband, with flattering success. To-night we are to have three choice pieces, the first of which is that popular comedy of "Done on Both Sides," Mr. Holland figuring as Mr. Pygmallon Phibbs. The second piece, the interesting dramatic anecdote of "Box & Cox," and a repetition of that laugh-compelling extravaganza of "Crusoe the 2d," besides the performances of Chubbees the eminently gifted Indian chieftain, who, on the flute and the saucepaneana, will astonish the visitors by his execution of "Auld Laug Syne," "The Fisher's Hornpipe," and "Life on the Ocean Wave."

CHRISTY'S MINSTRELS have only three more evenings to spare to New York—and one afternoon concert on Saturday. Their excellence and superiority as Ethio-pean minstrels, are so well known and universally ac-knowledged, that these parting concerts will doubtless be fully attended.

TABERNACLE-STEVERNARRISHE.-These harmo 1001 performers gave, last evening, their eleventh grand concert, which was well attended, and the assembly concert, which was well attended, and the assembly seemed highly delighted in hearing their bewitching music. The entertainment began with the "Grand Coliecum March," which wasexecuted to perfection as well as the overture to "Lestoch". The finale to the "Jewess" from Hickory, was received with unbounded applause; and the tableux of harmony, entitled "The Night's Review," was performed in a masterly financer. The "Jubilea Quadrille," as also the "United States Folka," were a splendid combination of the most beautiful strains, and made a great sensation among all present. Their soirce masicale ended with the waltz of "Welcome in the [Greenwood," and the gallop, "First Everpreen," which are among the dances of Labitkry, the prettiest we have ever heard. The Steyermarkishe are nightly improving in the engouement of our people, and they deserve the success they have met with. These eminent performers will give a concert this evening at the Female Academy, Brooklyn. Their great popularity in our sister city will insure them a full house.

Tiger Look.—For some time past, Corporal Thompson has had on his premises, corner of Broadway and Twenty-Third street, two very fine tigers, which were heautiful animals, and much admired by all who have seen them. On Tuesday evening last, they made their escape, and nothing was heard of either until yesterday afternoon, when one of them was seen by a person in the Eighth Avenue. Lest any injury might be done by the animal, he procured a gun and fired at it, the bail taking deadly effect. The other of the beasts has not been seen or heard of since his escape.

Drowned—The body of Mr. Augustus F. Baden, who left his residence in Delancy street, on Sunday last, was found yesterday at Stapleton. Staten Island. The coroner heid an inquest upon his body, when a verdict of found drowned was returned.

The U. S. Steamship Relief.—This sloop of war arrived yesterday at quarantine, from Alvarado, having on board ninety mariners, on the sick list, all of whom were carried to the Navy Hospital.

Serious Accident at Newark.—About 5 o'clo ik yes terday afternoon, as the Morristown train of cars was about starting, a horse attached to a light wagon, in which were a lady and gentleman, became frightened at the locomotive, and made several plunges up the side of a steep embankment, upsetting the carriage, and failing back upon them, injured the lady and gentleman very seriously. At the last account, the gontleman was said to be doing very well.

New York Volunteers.—The remaining portion of the 1st Regiment of New York Volunteers, comprising a companies, embarked on the 24 instant, under command of Lieut. Col. Jas. C. Burnbam, from New Orleans, on board the "Fanny Forrester." and may therefore, be expected to arrive about the 21st.

An Intolerable Numarce.—For some time past, it has been a cause of general complaint that gented and re-pectable ladies are censtantly insuited by a gang of follows engaged as clerks in the civiting stores on the cast side of Chatham street, andthe matter has of late become so common that, even though business demands it, many ladies will not pass on that side of the street. They are not satisfied with catching every countryman by the collar who passes by, and end avor to force him in the shops to purchase their goods; and if they refuse, as has been the case, to commit a violent assault upon his person; but females who pass quietly, are scoffed at and frequently the most indelicate language used towards them. So great is their propensity for disorder, that they not unfrequently fight among

themselves. On Monday afternoon, there was quite an imute among them, when several received black eyes and bloody noses. This disgraceful proceeding has gone far enough, and the Mayor should detail a corps of policemen for a while in that street, that any offender might be arrested and brought to a proper knowledge of his ungentlemanly and outlawed conduct. Persons are every week arrested for insulting smales, and there is no reason whateverte allew the chaps to do as they please, and go unwhipt of justice.

U. S. SLOOF OF WAR (STORESHIP) ERIE.—This ship is now on the dock, at the foot of Pike street, undergoing repairs and coppering. She is destined for the Mediterranean station.

MONEY MARKET. Wednesday, July 12.6 P.M.

It was announced early in the morning that the steamship Niagara was telegraphed below Boston, and business of all kinds was suspended. The sales at the board were made while all was doubt, and the prices ruling are therefore independent of the com-plexion of the news. Treasury notes fell off 1/4; Ohio 6's, 1/4; Norwich, 1/4; Harlem, 1/4; Long Island, 14; Reading Bonds improved 14; Norwich, 14. The sales were small. Soon after the adjournment of the board the tenor of the news was announced, and the greatest excitement prevailed. All business was at a stand still, and knots of people were in all parts of the street, discussing the nature and effect of the accounts. As yet the news has had no effect upon the markets, but the general impression is that it will be good. There were only two sales at the second board, which shows the little disposition to operate until something more definite is known of a Tairs on the other side.

The suspension of the Canal Bank of Albany, one of the leading Safety Fund institutions of this State, has operations of the Safety Fund system, since its adop-tion. It will be perceived by the annexed statement, that the State has been compelled to issue a stock for the redemption of issues of suspended Safety Fund banks, in anticipation of payments into the fund by the new aining solvent banks of the State, established upon that system. Up to November last, eleven Safety Fund banks had exploded, and the contributions of all the Safety Fund banks of the State, had, up to that time, not been sufficient to provide for the payment of the bills and sundry debts of these eleven banks, within about one million of dollars; and this deficiency had to be made good by an issue of State stock, on a

have to make good, is over half as large as all the contributions up to the 30th of September last, and it would require a period of at least ten years, to enable these banks to make up that amount. It will therefore be seen that it is utterly out of the question for this fund to be made available for any future losses. State, has to depend entirely upon itself, and the bills have no other security than the solvency of each instithe statements recently published of the condition of the Safety Fund banks generally, is sufficient to withtheir issues at once upon them for redemption. The public have long been deceived by this "Safety Fund," should be clearly understood. The returns published in to-day's-Wednesday-Herald, show that some of the banks, doing business under this system, have a circulation in the neighborhood of two hundred thousand dollars, and specie on hand of only about three thou-

sand dollars. This exhibits a weakness calculated to alarm any bill holder, as the result of even a limited d mand for specie must inevitably be an explosion. Since the 1st of July several railroad companies in the transportation of passengers, and most of the com-panies in Massachusetts now charge but two cents per fares are decidedly the most productive rates, and all those companies which have adopted them have realized an increase in their receipts. Railroads diverging from and connected directly with this city, have the lowest tariff of charges; and the fact that all of them do not pay dividends, is no argument against the soundness of the policy In all thickly settled sections of the country, low fare must ultimately prove the most productive, and railroads in all parts of the country must, sooner or later, adopt a much lower tariff o; charges than is at present enforced. The annexed statement exhibits the length of the principal railroads in the United States, the through fare, and rate

The lowest in the list is the New York and Erie: the New York, Harlem and Albany, the next; and then the Boston and Lowell, Worcester and Fitchburg. It will be perceived that some of the charges on the Southern lines are double and treble those of the North and East. There is a necessity for this in the comparatively limited passage traffic. In the North and East the most productive rate is ten cents per mile. Every section of New England is thickly en sugh settled to make that rate profitable, and we have no doubt it will be generally adopted. The New York, Harlem and Albany Railroad must ultimately be the most productive passenger line in the country, and its revenue from that source, at ten cents per mile, will probably exceed that of any other road in the country. Terminating in the very heart of the largest city in the Union, with branches extending into the most densely populated portion of the Eastern and Northern States, it must soon be exceedingly productive .-The passenger business, of all railroad companies, is the best paying part of the traffic, and any line favorably located for that, must be good dividend paying infound most productive, and the principle has become already so satisfactorily settled by those companies which have adopted it, that it is a matter of much mys-

New York, Wedder Change, that the steamer N agara was below at Boston, with a week's later news had the effect of checking operations in some articles of produce. Dealers were disposed to wait for full details of the commercial news before operating to any considerable sale extent. Holders of flour, however, were in clined to be some firmer, though sales of this State, common and Western brands, were made at about rates current before the steamer's arrival. A small lot of Ohio wheat was sold on terms stated below. Round corn was held at an advance—considerable sales of mixed were made at about previous rates. Meal rye and oats remained the same. Provisions were sold to a firex ent, at steady prices for Fork. Lard was held at an advance, with sales, however, at previous rates. Only a molerate business was doing in groceries, without any material change in prices.

Cotton Trade

Since the departure of the America, on the 27th ult, but a small quantity of Cotton has been brought out for sale. Up to Saturday, it inst., the weather was excessively hot and enervating, and the buying did not exceed 500 bales daily, some portion of which was by Continental shippers: on that day we received the mail per Cambria, which arrived at Boston the proceeding day—her accounts of a weak market—quotations reduced one-eighth—and holders pressing for sales—did not help us, and in fact reindered the business on that day and the Monday following, of so meagre a description that it is believed that the sales of the two days, did not in the aggregate, exceed 300 bales. These day being the National Birth day, of course no business was transacted. On Wednesday, 5th inst., a small enquiry was folt, and 400 bales were disposed of, at a reduction of about a quarter of a cent over "Middling," the price of that specific grade being well maintained. On Thursday, 600 bales were disposed of at the same line of prices. On Friday, 1500, and it was noticed that buyers bid more freely at the close of the day. On Saturday, a harder market was perceptible, and 700 bales were taken before 'Change, at rates one-eighth better than the average sales of the preceding day; after that hour we had a telegraphic desnatch from Boston, with a meagre account of the market at Liverpool, per Caledonia, received by the News steamer from Halifax—sufficient, however, to show that a more favorable turn had taken place at Liverpool, holders having recovered from the panie they had displayed during the previous week, and the large requirements of the home trade had been met by sufficient steadiness to create an advance of ½d on their previous sales. About 500 bales were taken for export that afternoon, at prices one-eighth of a cent better than were paid in the merning. By the receipt of letters yesterday, the steamer having arrived on Sunday,
